Brown Machine Expands Cut Sheet Thermoforming Machinery Offerings

Beaverton, MI – Brown Machine LLC has expanded its line of cut sheet thermoforming equipment and support services to provide what it believes to be the most complete and comprehensive offering in the industry. The addition of new small and mid-tier machines and systems are now being marketed to customers not traditionally served by Brown. This expanded product line completes Brown’s long-term plan for better serving customers in a wider range of applications. All new machine offerings will be fully supported by Brown’s expanded engineering, manufacturing, service and parts operations.

“We can now deliver a complete range of cut-sheet shuttle and rotary thermoforming machines in conventional and high-pressure configurations from basic entry level machines to fully-automated lines. Our new line of equipment will offer advanced features at very attractive prices and will include all of the services and warranty support that have become hallmarks of Brown Machine over the past fifty years,” stated Dick Lacana, Brown Machine President.

Richard Brashier, former founder and president of Vector Machinery, Inc., has been appointed president of Brown Titan, a recently established business unit responsible for the

design, manufacture and delivery of Brown Machine’s all new line of cut-sheet shuttle and rotary thermoforming machines and pressure formers.

Recently, Brown announced that it had contracted The Foxmor Group to expand its cut-sheet sales operations. “Collectively, all the elements for delivering the expanded product line to market are now firmly in place, but make no mistake, Brown Machine will continue to market and fully support its traditional cut-sheet equipment for vacuum, high-pressure and custom applications with all the focus and dedication of resources as traditionally offered. The recent additions will allow us to expand our equipment offerings, reduce delivery times and provide more strategically focused customer service,” said Jim Robbins, Brown’s vice president of marketing.

As a world leader in thermoforming solutions, Brown Machine designs, engineers and manufacturers continuous in-line thermoformers and trim presses, as well as tooling and related components. Brown continues to lead the industry in conventional cut-sheet, high-pressure and twin-sheet thermoforming process technology, providing specialty systems for such applications as automotive, recreational, appliance and industrial market segments. Brown Machine provides 24-hour on-call parts and service support.
